MaxxBass[®] Featured in new Delphi Premium Audio System for XM Radio

Waves technology improves bass response using patented psycho-acoustics technology

Detroit, Michigan and Tel-Aviv, Israel, July x, 2007 — WAVES AUDIO LTD., a leading provider of audio signal processing technologies, announced today that Delphi's new Premium Audio System is utilizing its MaxxBass[®] technology. MaxxBass and other technical advancements enable the Premium Audio System to bring unmatched audio quality to XM Radio customers who want the flexibility of a portable system.

"The Premium Audio System delivers user perceived bass response to 30Hz using the MaxxBass technology. Obtaining a frequency response this low normally requires a subwoofer that is impossible in small, battery operated systems," said Jake Sigal, product manager, Delphi Consumer Electronics.

"Waves professional tools are used in recording virtually all the top music and movie soundtrack worldwide, and we are excited to bring the capabilities of these same tools to Delphi's Premium Audio System," stated Paul Bundschuh, vice president of sales and marketing, Waves Semiconductor and OEM Licensing Division.

About Waves Audio Ltd.

Waves is the world's leading developer and provider of professional digital audio processing tools. Waves technologies are used to improve sound quality in the creation of hit records, major motion pictures, popular gaming and multimedia titles the world over.

About Maxx®

With more than a decade of leadership in the development of psycho-acoustic algorithms, Waves now offers a variety of solutions under the Maxx® brand. Manufacturers of consumer electronics are dramatically improving performance and reducing system costs using Maxx technologies. These solutions include custom semiconductor devices and licensing Waves proprietary algorithms to DSP and computer platforms. Maxx solutions are rapidly being adopted by firms such as Sony, Sanyo, Samsung, JVC, NEC, Delphi, Altec Lansing and others.
